Information Technology Student | Software Developer | AI/ML & Data Analyst

Education

SRM Institute of Science and Technology, Tiruchirappalli

India

B.Tech. in Information Technology | CPGA-9.07

Sri Chaitanya Techno School

Coimbatore, India

Grade XII | JEE Main Percentile: 94.1

Sharanalaya International Montessori School

Coimbatore, India

Grade X

Internship Experience

Wipro Limited

Coimbatore, India

Intern – Power Platform and AI/ML

Jan 2026 – Feb 2026

- Developed enterprise applications using **Power Apps** to improve workflow automation, task tracking, and business process efficiency.
- Designed **SharePoint**-based data systems, **Microsoft Excel** reports, and **Power BI** dashboards for KPI reporting, analytics, and decision support.
- Collaborated in **Agile** development cycles with cross-functional teams while documenting blockers, updates, and implementation progress.
- Applied **NLP**, rule-based validation, and **AI/ML** concepts to automate employee request decision workflows.

NLC India Limited

Neyveli, India

Project Intern

Jun 2026 – July 2026

- Building an **Employee Complaint Management Portal** enabling staff to report, track, and resolve workplace issues through a centralised web interface.
- Developing an internal organisational website to streamline employee service requests and maintenance management, reducing manual coordination effort.

Projects

AI-Driven Employee Request Validation System

- Developed an intelligent validation system to automate employee WFH, leave, and travel request checks using **NLP**-based text processing and rule-based business logic.
- Built **REST API** workflows with **Flask** to collect request data, validate eligibility conditions, and maintain **Microsoft Excel**-based request tracking and validation reports for approval analysis.
- Prepared **Gemini API**-style prompt workflows to generate AI-based decision explanations, supporting future enterprise decision-support features.

Smart Industrial Portal

- Built a **Python (Flask)**-based web portal automating industrial complaint logging and operational issue management.
- Designed and integrated a **MySQL** database for centralised storage of employee profiles, ticket categories, and complaint status histories.
- Implemented secure authentication and a ticket submission workflow supporting image uploads, priority levels, and real-time tracking.

Smart Learning for Young Minds

- Developed a **web-based learning platform** connecting students, teachers, parents, and administrators through a unified learning environment.
- Implemented **interactive lessons, quizzes, assignments, assessments, and progress tracking** to support personalized and engaging learning.
- Designed role-based dashboards with **secure authentication, parent-teacher communication, notifications, and performance analytics** for effective learning management.

Technical Skills

Languages: Python, C, C++

AI/ML & Data: Machine Learning, NLP, Microsoft Excel, Power BI

Databases: MySQL, MongoDB, Database Management Systems (DBMS)

Core CS: Object-Oriented Programming (OOP), Three-Tier Architecture, Data Structures

Web & APIs: Flask, REST APIs

Tools & Platforms: MATLAB, Microsoft Power Apps, Power BI, Agile

Soft Skills: Problem Solving, Communication, Teamwork, Adaptability

Certifications

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate** – Oracle University
- MongoDB Basics for Students** – MongoDB University
- Introduction to MongoDB (For Students)** – MongoDB University
